Dear Caroline,

I'm so glad to hear from you and learn I'm a winner in the competition. I've decided to go to New York with my best friend on December 28th. Since this is the first time for us to go to New York, we hope that someone can meet us at the airport. And could you please tell us which hotel we will stay in while we are there? If possible, we'd like to have a guide to show us around the city.

We also hope that we can have some Chinese food at times.

Best wishes!

Li Lei

B) One possible version:

Most of us do not realize the importance of doing exercise. Without a healthy body, we cannot study or do anything well. In my opinion, students should exercise much more. Doing more exercise will make us healthier and more energetic. It will also help to reduce stress, which will help us study better. A good student should have a strong body as well as high marks, so I think it is important and necessary for us to exercise every day. I hope that everyone does more exercise from today on. Then we can all get good marks.

W: When are you coming back home?

M: Next Monday morning.

W: Well, have a great time!

Part IV. Passages

A) Listen to the passage. Choose the best answer to each question. The passage will be read twice.

Hello, everyone! Today I'll talk about the Leaning Tower of Pisa in Italy. Why does it lean? It leans because of a mistake.

In 1173, the people of Pisa wanted to build a bell tower. They wanted the tower to be the most beautiful one in Italy. The city also needed a bell tower because the church did not have one.

However, there was a problem. As soon as the first floor of the building was finished, the tower started to lean. Builders tried to make the building straight again as they added more floors, but they didn't know how to make it stop leaning.

It took almost 180 years to finish the tower. Since then, it has leaned by one millimetre every year. By 1990, it was leaning to one side by about 4 metres. It was also slowly sinking into the ground. Many people became worried that it would soon fall apart.

In 1998, repair work began on the tower, and by the end of 2001, it had been moved back by 45 centimetres. The tower will still lean, however, so it will need to be repaired again — in another 200 years.

B) Listen to the passage. Complete the table with information from the passage. Fill in each blank with no more than three words. The passage will be read twice.

Okay everyone, thanks for coming to this meeting. I'm going to give you the final details about our geography trip. Now, on Friday, you'll need to come to the back gate of the college, because that's where the coach will be. It'll leave from there at seven thirty, but I want you to be there at a quarter past seven, please, so we have plenty of time to put the luggage on the coach.

Talking of luggage, don't bring too much — we'll only be away for two nights! Just take a small bag. That should be enough.

For the project work itself, you'll need to take photos, of course, but we'll use the cameras from the department for that. You'll each need a notebook, so you can write down what you find.

Now we've booked into the Knellsmere Hotel, that's K-N-E-double L-S-M-E-R-E and, by the way, they have a public phone if you want to ring your parents and don't have a mobile phone. We should get to the hotel by mid-afternoon, so you'll have some free time until we have dinner. They have good facilities there. There's a gym and I know lots of you will enjoy using that. Right, well, are there any questions?
